BEGINNING OF A NEW ERA OF TECHNOLOGY

TORNADO FLUSHING

Rectangle Western Closet(WC) has two or more nozzles that create a centrifugal action. Where the water flows in anticlock wise with downward pressure. This cyclonic action reduces waste buildup and keep the WC cleaner. It is more effective in one flush than most toilets are with multiple flush. And water saving is more than 40% compared with traditional toilets.

TORNADO FLUSHING

SIPHONIC FLUSHING

SIPHONIC FLUSHING

A gravity flush system uses vacuum to pull waste from the toilet bowl through the trapway and into the outline. This is done by the shape of the trapway acting as a siphon. Siphonic toilets tend to have a cleaner bowl and are easier to clean.

RIMLESS

A rimless toilet is simply a toilet without a traditional rim. A direct flush technique shoots water around the edge of a smooth pan. As there is no rim, rimless toilets are easy to clean and more hygienic than a traditional toilet. It is far more powerful flush and more economical than traditional rimmed toilets.
